### WARNINGS:

- HANDLE WITH CARE
- May cause irritation of the skin, eyes, mucous membrane and skin sensitisation.
- Contents are flammable and under pressure.
- Do not spray near open flames or directly onto electrical equipment.
- Do not leave on hot surface e.g., stoves, radiators or in direct sunlight.
- Temperatures higher than 50 °C may cause the container to burst.
- Keep out of reach of children, uninformed persons and animals.
- Do not puncture or incinerate container.
- Reduce residual efficacy may be observed on painted surfaces. Ants and cockroaches will be controlled for up to 2 weeks on glass and wooden surfaces only. Fleas will be controlled on carpets for up to 2 weeks. Repeat surfaces as necessary.

### PRECAUTIONS:

- Avoid excessive inhalation.
- Do not use in the presence of persons with known sensitivity to pyrethroids.
- Should signs of sensitivity be observed, obtain medical advice.
- Avoid contact with skin, eyes and clothing.
- In case of contact, wash thoroughly soap and lukewarm water.
- Remove pets and cover fish tanks before spraying.
- Do not spray onto food utensils or food preparation surfaces.
- Do not spray onto plants or animals.
- Avoid wetting plastic, rubber and asphalt surfaces such as tiles and floor coverings.
- Do not spray on curtains, wallpaper or similar materials that may stain.
- If product is misused and results in accidental illness, consult a doctor immediately.

### DIRECTIONS FOR USE:

- Use only as directed.
- Shake well before use
- Hold can as upright as possible

### TO KILL CRAWLING INSECTS

- CONTACT SPRAY  
Spray a one (1) second burst directly at the CRAWLING insect.

### TO KILL CRAWLING INSECTS ON SURFACES

- LONG LASTING CONTROL  
Spray directly on to surfaces where insects travel, alight or enter buildings. When spraying, nozzle should be held 15-30 cm from the surface to ensure effective wetting of the area. For flea control spray carpets and the top and underside of mats. (Reduced residual efficacy may be observed on painted surface – refer to warnings). Retreat as necessary.

### FLUSHING INSECTS OUT OF HIDING PLACES

- Spray 1-2 second burst into cracks, crevices, cupboards, drawers and under sinks or other potential hiding places. This ensures hyperactivity and subsequent pick-up of the insecticide by the insect.

300 ml

### Crawling Insects

Cockroaches, Ants, Fish Moths, Crickets, Bedbugs, Fleas.
